

Single-Point Rubrics

Single-Point Rubrics

A single-point rubric is similar to an analytic rubric in that it breaks down the components of an assessment. It is different in that it does not list all the ways a learner does not meet expectations or exceed expectations. Instead, it only lists the criteria for proficiency.

Advantages:

- Learners are more likely to engage with a single-point rubric because it contains far less writing than an analytic rubric but still gives information about expectations.
- Areas to work on, and areas of excellence, are open-ended. Instructors do not need to anticipate all the ways a learner might excel or areas that might need work.
- There are no limits on the ways that a learner might succeed.

Disadvantages

- Single-point rubrics might require a lot of writing on the instructor's part to describe areas of success and areas for further work.

(Gonzalez, 2014)

Concerns <i>Areas that Need Work</i>	Criteria <i>Standards for This Performance</i>	Advanced <i>Evidence of Exceeding Standards</i>
	Criteria #1: Description reflecting achievement of mastery level of performance	
	Criteria #2: Description reflecting achievement of mastery level of performance	
	Criteria #3: Description reflecting achievement of mastery level of performance	
	Criteria #4: Description reflecting achievement of mastery level of performance	
0-80points	80-95 points	95-100 points
