Assignment creation support

The following appendix has been created to help instructors more readily create assignments in support of learning with the [Pressbook Fundamentals of Community Engagement: A Sourcebook for Students](). We suggest that instructors consider assigning 3-4 of the exercises embedded in the sourcebook.

To create flexibility for as many applications as possible, submission functionality is not embedded in the Pressbook. Rather, instructors should require that students submit the answers to the exercises in a separate Word file through their learning management system.

The following are a list of the exercises available in the Pressbook.
