

Hospital Placements Requirements
Office Administration Health Services OFAH
2024-2025

MEDICAL REQUIREMENTS

Immunizations are required for placements in hospital settings. Book an appointment with your Physician/Walk-In Clinic/Health Care Practitioner.

Immunization:	Completed/dated:
✓ Measles, Mumps & Rubella (blood titer/serology)	_____
✓ Varicella (blood titer/serology)	_____
✓ Flu	_____
✓ Hepatitis B (or blood titer/serology)	_____
✓ Tuberculosis Skin Test (2 steps with dates)	_____
✓ Covid 19 – fully vaccinated* if relevant (RVH not required)	_____

If you have no record of immunizations have serology (blood test) titers completed first to determine immunity. See immunizations above with serology indicated.

Hospital onboarding may have their own forms for completion wait until receiving onboarding information to have documentation completed for proof of immunizations.

Health Care Provider Signature or Stamp _____

Additional Context for Immunizations

Test indicated by the term serology is an antibody titer to detect the presence of measures the number of antibodies within a person's blood.

-For COVID-19 vaccination – “fully vaccinated” is defined as 14 days after 2nd dose. In lieu of a COVID-19 vaccine, some clinical agencies may accept a medical note exemption from your physician. Ask your doctor for this if you are unable to be immunized for medical reasons and be prepared to share it with the clinical agency.

-Measles, Mumps & Rubella (if serology/titer needed, copy of laboratory test report)

-Varicella (if serology needed, copy of laboratory test report)

-Td booster (Received routine childhood immunizations) Booster required every 10 years

- Seasonal Flu Shot (every year in November/December)
- Hepatitis B (serology titer, copy of laboratory test report)
- Tuberculosis Skin Test 2 step (ask your doctor to document all TB dates given, dates read & induration results within the last 12 months)
