## PRE-LAB 7: UNKNOWN MOLECULAR LAB PART I

Fill out the chart below after reading the lab.

Table 1: Steps in a single cycle of Polymerase Chain Reaction

| Step             | Conditions    | Purpose       |
|------------------|---------------|---------------|
| 3.35             | (Temperature) | . d. <b>p</b> |
| Denaturation     | , ,           |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
| Primer annealing |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
| Extension        |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |
|                  |               |               |

## **Lab 7 Evaluation**

You will be evaluated on your pipetting skills in this lab. See FOL for the rubric and refer to lab 2 Basic Techniques for an overview of pipetting.
