GFP

Lesson 7a. Key (scale) of "D" Major

Date:		

The first step is to **memorize the scale.** This is a good plan for every time you encounter a new scale for the first time. Memorizing a scale is not too difficult. All scales are just sequences of notes in alphabetical order. Pay attention to the Key Signature.

It is very important to get the picking sorted out very accurately. The picking technique must be practiced until it is totally "reflexive." (=no thought required)

There is no great sense in moving farther than this page until you can perform all of the material at a relatively good tempo. Anything slower than a fast walking pace is not good enough.

Review! Review some more	! Review even more! You	can't possibl	v review too much
